Trusted partners in compliance and
technological excellence

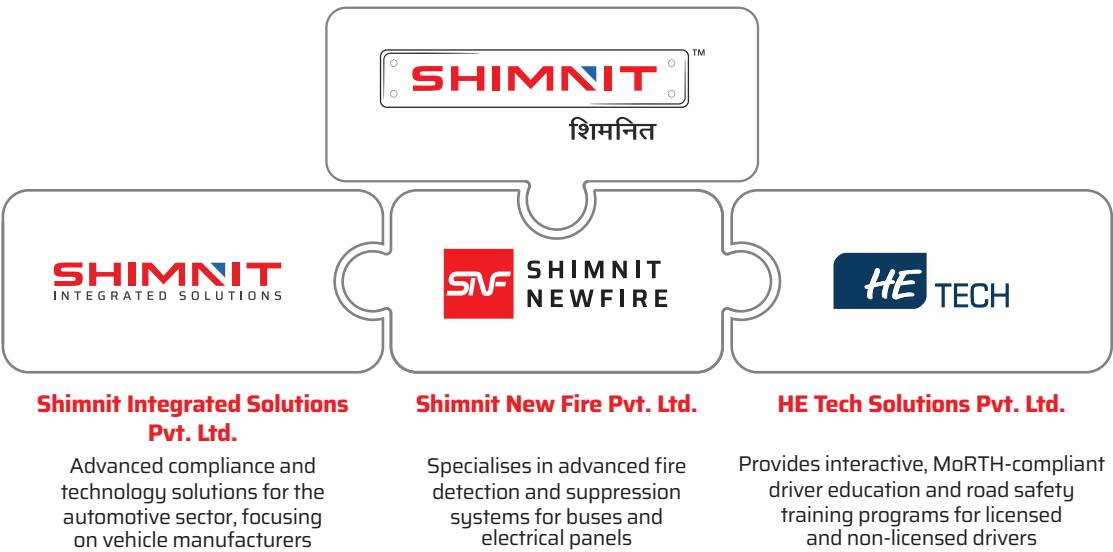

Introduction to Shimnit India

Shimnit has been at the forefront of manufacturing High Security Registration Plates (HSRP), adhering strictly to the Ministry of Road Transport and Highways (MoRTH) guidelines, with a steadfast focus on national security.

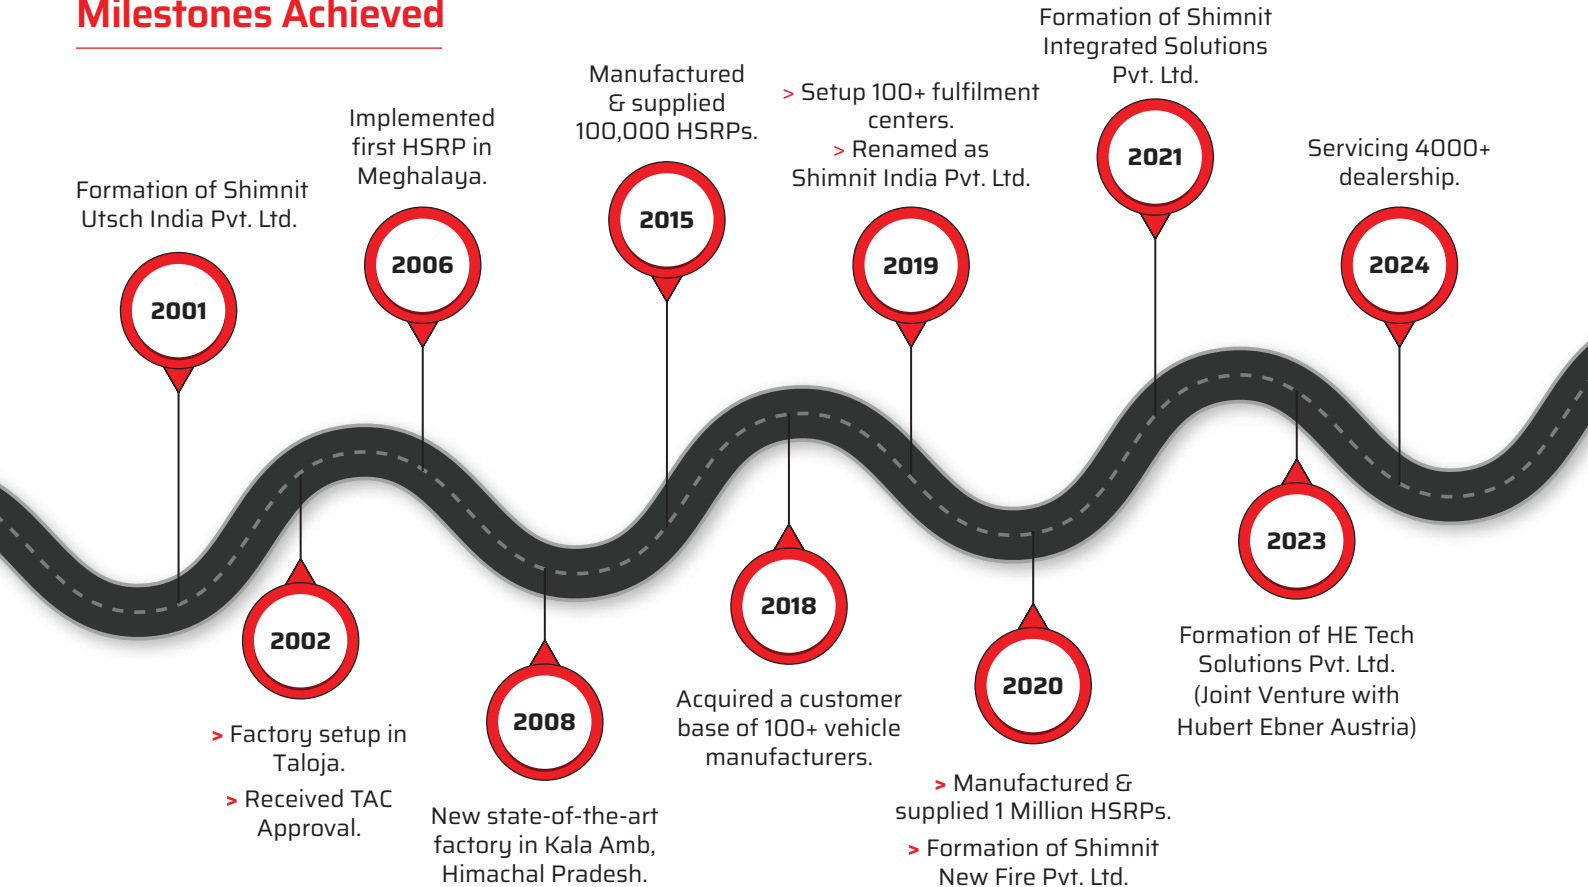

Our journey began in 2001 through collaboration with German experts. Since then, we've amassed extensive experience in the number plate industry, propelling us to the forefront of automobile safety and security in India. We were the first company in India to implement HSRP way back in 2008 for the state of Meghalaya.

We have obtained Type Approval Certificate (TAC) and multiple Conformity of Production Certificates (COP) from the Central Road Research Institute (CRRI).

Milestones Achieved

Introduction to High Security Registration Plates (HSRP)

What?

High Security Registration Plate (HSRP) is a standardised vehicle license plate mandated by the Government of India for all motor vehicles under Rule 50 of the Central Motor Vehicles Rules (CMVR), 1989 way back in the year 2001.

Why?

HSRPs enhance vehicle identification and ensures issuance control of vehicle number plate, which reduces illegal activities like theft and cloning, improves road safety, and are integrated with the VAHAN system for efficient vehicle tracking.

When?

On December 6, 2018, a mandate required vehicle manufacturers (OEMs) to equip all new vehicles produced from April 1, 2019, with pre-fitted HSRPs. The State Transport Department oversees the transition for vehicles made before this date to ensure uniform vehicle security nationwide.

Our Strengths

Manufacturing Excellence:

State-of-the-art plant with annual production capacity: 27 million plates.

Quality:

Adherence to stringent ISO standards for security and quality.

Optimised Process:

Tailor-made Software for HSRP issuance and management.

Rapid Turnaround Time (TAT):

Commitment to delivering 98% of orders within 24 hours across India.

Extensive Network:

400+ Fulfilment Centres ensuring Pan-India presence.

Compliance Expertise:

Ensuring adherence to regulatory requirements.

Robust IT Infrastructure:

Secure data management and tracking backed by Azure cloud platform and Disaster Recovery (DR) suits that ensures zero downtime and business continuity.

Introduction to Shimnit Integrated Solutions (SISPL)

Founded in 2021, SISPL is dedicated to shaping the future of the compliance services in transport sector with special focus on the electric vehicle industry. With our Technological capabilities, it delivers seamless, standardised vehicle identification and compliance management services. SISPL is committed to support the rapid evolution of the EV market with Subsidy management consulting services as well.

Compliance Services

We offer a range of services tailored to help automotive companies, particularly vehicle manufacturers, dealerships as well as the Banking, Financial Services, and Insurances (BFSI), align their operations with the specific compliance and regulatory requirements of the transport sector. Staying compliant with evolving standards is crucial for operational success, market competitiveness, and achieving efficiency. Our solutions ensure streamlined compliance processes, providing peace of mind in the dynamic and ever-changing transportation sector.

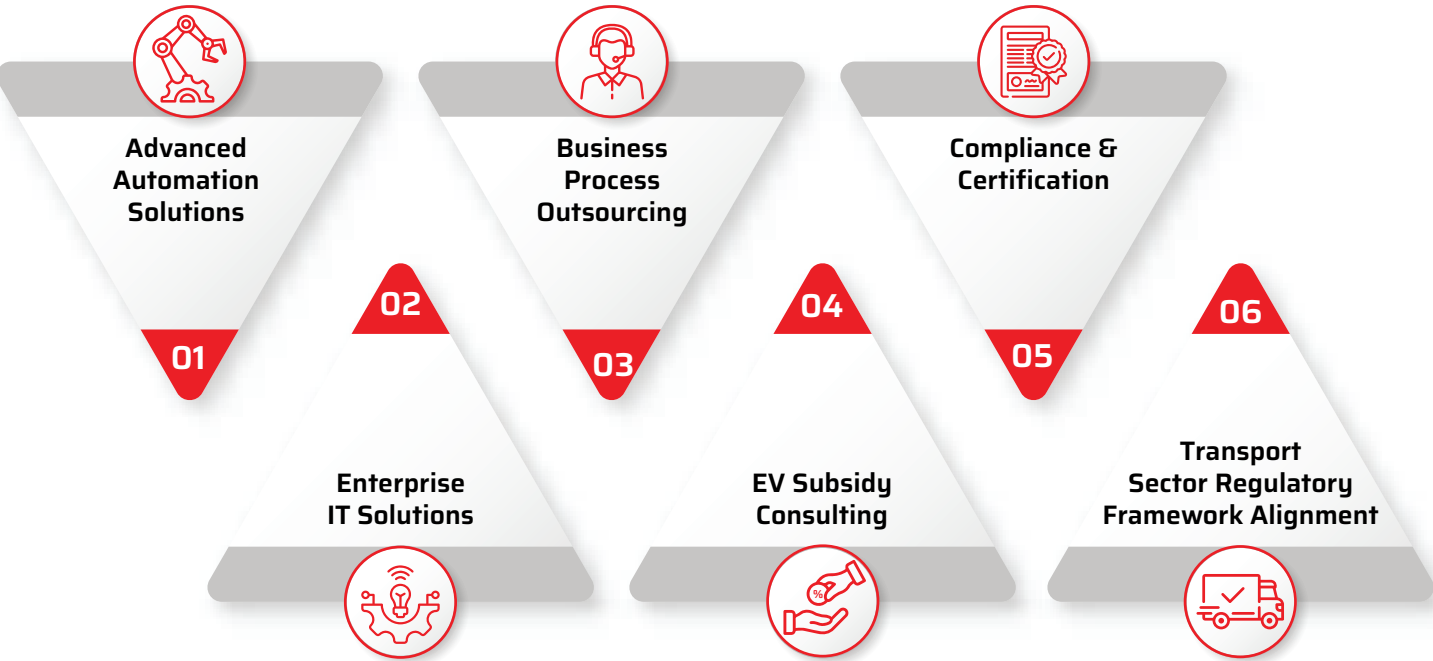

EV Subsidy Consulting

Our dedicated consulting division focuses on compliance, certifications and subsidy consulting in the electric vehicle (EV) sector. To empower EV manufacturers and their dealerships with seamless subsidy claims related support through our cutting-edge tech based compliance solutions thus fostering sustainable transportation.

Know your HSRP

Ingressed IND legend for national identity & standardisation

Hot stamped chromium based hologram prevents counterfeiting

Snap locks are tamper-proof and self-destruct upon tampering, providing instant evidence of tampering

Laser etched 12 digit code uniquely sequenced and traceable acts as a watermark and cannot be erased

Superior grade reflective sheeting visible from a minimum of 200 metres enhanced visibility prevents accidents during night/ low visibility

Security inscript
Hot stamped foil with 'INDIA' inscript on the alpha-numerals and border prevents printing and screen printing, protects against counterfeiting

Embossed alpha- numerals & border for enhanced readability and easy identification

What are the features of Third License Plate?

BLUE COLOUR - PETROL AND CNG VEHICLES

The Third License Plate (TLP) in the form of self-destructive type, chromium-based hologram sticker is affixed on the inside left-hand top side of the windshield of the vehicle. It contains all information pertaining to a vehicle's registration.

ORANGE COLOUR - DIESEL VEHICLES

TLP applicable for BS IV and prior vehicles

Application:

These stickers are applicable to BS IV vehicles and prior.

Compliance:

The third registration mark in the form of self-destructive type, chromium-based hologram sticker shall be affixed on the left-hand top side of the windshield of the vehicle.

Rule:

S.O. 1759(E)

GREY COLOUR - OTHER VEHICLES

A Small Sticker with Big Benefits for Secure and Smarter Rides!

BLUE COLOUR - PETROL AND CNG VEHICLES

ORANGE COLOUR - DIESEL VEHICLES

GREY COLOUR - OTHER VEHICLES

As per the Rule 50 of CMVR, 1989, states the mandatory fixation of the third registration mark or Third Licence Plate (TLP) on the inside of the vehicle's windshield, positioned at the top left corner. This serves the purpose of double secure identification mark of a vehicle.

TLP applicable for BS VI vehicles

Application:

These stickers are applicable to BS VI vehicles.

Compliance:

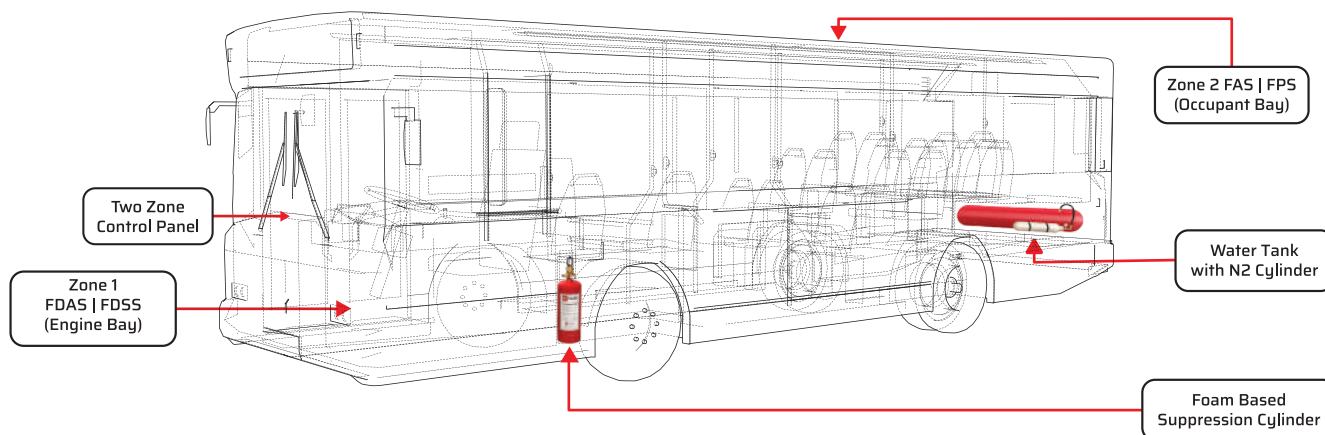

Vehicles complying with BS VI emission norms shall have a 1 cm green strip at the top in the third registration plate.

Rule:

Rule 50 of CMVR 1989

Automatic Fire Safety System for Buses

Fire Detection and Suppression System (FDAS | FDSS) at Engine Bay

System Specifications

- ▶ SS - Pipe fitting & Nozzle
- ▶ Depending on the size of the Engine Bay, the system uses approximately 7 litres of Foam Based Extinguishing Agent
- ▶ Adjustable pipe length & nozzle angle to cover fire-susceptible areas in the engine
- ▶ Anti-corrosion PU coating inside the cylinder

System Features

- ▶ Automatic activation upon detection of fire in the Engine Bay
- ▶ Instant flooding to suppress the fire in seconds
- ▶ Low Pressure System at 20 Bar
- ▶ Lightweight Cylinder
- ▶ Pressure Gauge

Advantages

- ▶ Environmentally Safe
- ▶ Biodegradable
- ▶ Manual Activation
- ▶ Non-Toxic

Fire Protection System (FAS | FPS) at Occupant Bay

System Specifications

- ▶ Water flow rate per nozzle: 1.65 l/min at 7 bar
- ▶ 90 degree cone angle of spray nozzles
- ▶ Fittings: SS 304/316 material
- ▶ Scope of Supply: Spray Nozzle
- ▶ 3-minute operation

System Features

- ▶ Capable to serve buses from seating capacity of 20 to 80
- ▶ Only manual activation of the system to avoid system activation during a false alarm
- ▶ Low Pressure Water Mist System – Full Cone Nozzles
- ▶ Dust compensated smoke detectors to avoid false alarm
- ▶ Manual activation feature
- ▶ Vibration and Shock-Proof: Plug and play saddle system to minimise vibration and shocks

Advantages

- ▶ Easy Installation
- ▶ All SS components
- ▶ Dual pressure display
- ▶ Vibration & shock-proof

Pioneers in Road Safety Education

Empowering Responsible Driving through Innovative Solutions

HE TechSolutions Pvt. Ltd. (HE-Tech) is a joint venture between Shimnit India Pvt. Ltd. and Hubert Ebner India Pvt. Ltd., bringing world-class road safety solutions to India. With Hubert Ebner's 40 years of European expertise in road safety training and Shimnit's strong industry presence, HE Tech offers cutting-edge offline and online solutions for road safety management, having trained corporates, NGOs, government departments, and diplomatic missions across India.

Our Offerings

Training & Courses:
Suraksha, Jagriti, Disha, and customised defensive driving programs

Training Aids & Equipment:
E-learning, two-wheeler simulators, P-drive systems, and more

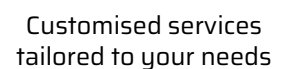

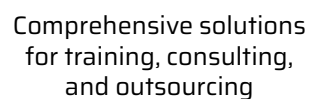

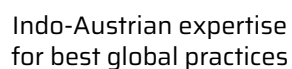

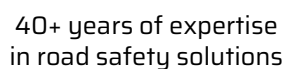

Concepts and Services:
Training outsourcing, DASP, VAP, JRA, & driver placement

Consulting:
Dipstick studies, crash reduction solutions, audits, and content development

A conceptual image showing a person's hands typing on a laptop. The scene is overlaid with numerous semi-transparent digital icons and data visualizations, including a pie chart, a bar graph, a line graph, a shield, a magnifying glass, a gear, a lightbulb, a document, a network diagram, and a circular progress indicator. The background is a blurred office setting, and the overall color palette is dominated by blues and greys, with a red curved line at the bottom.
